27 August, 2015

Dear Mrs. Bagrationi,

On behalf of Prof. Zeev Rotstein, CEO & Director of the Sheba Medical Center and Prof. Amos Toren, Head of the Pediatric HematoOncology Department, we thank you for your donation of \$1,050 on behalf of the department. I will take this opportunity to present an essential description of that unique department

The HematoOncology Department admits 150 new patients annually, ranging in age from infancy through to adulthood. These patients come from all over Israel and also from overseas.

The HematoOncology service includes both a hospitalization ward and set of separate rooms (isolated/sterile in nature) for children receiving bone marrow transplant; a day clinic; a head tumor unit; a bone marrow transplantation unit and the very unique Marion and Elie Wiesel Children's Pavilion – the first and only Pediatric Hospice of its kind that provides treatment and palliative support for children throughout stages of their disease when clinical treatment is no longer effective. The HematoOncology service also includes a Clinical Research Unit that works in collaboration with the Sheba Cancer Research Center and the research labs of the Sheba Hematology Institute – these form one of the leading pediatric cancer research units.

The field of HematoOncology has an ever growing range of treatments and recovery rates thanks to the innovative and new clinical options and ground breaking research.

Since we continuously work to raise funds to meet the needs and fulfill the clinical and research objectives we appreciate your instruction to channel your donation to that department

We would be delighted to have you as our guest at the Sheba Medical Center and give you a personal tour of the facilities.

Please let me know if we can provide you with any further information either regarding the needs of the HematoOncology service or a visit to Sheba.

Sincerely yours,

A handwritten signature in blue ink that reads "Rachel Talmi".
